

Task description

3.5.1 Summary of peer review

Setup:

Conduct the test at least once.

Use two Peers at the same time (*they have to be from two different groups*).

Plan the test.

Go through what you have done so far and your intentions with it
(get the first impression and feedback from the peers).

Focus areas:

Would the user know what story it is?

Would the user understand the different type of characters?

Would the user understand what to click on?

Would the user expect something specific to happen?

What have you planned that makes the scene interesting for the target group?

Would the user laugh or get surprised to the extent the team planned and when you planned they should?

Summary of peer review:

1

Describe the test setup

2

Who are the two experts and from which group

What was the experts overall impression

What specific input did you get from the experts?

3

What other earlier input did the group get? (from coaches etc., if any).

4

What changes and enhancements do you consider to use?
